# Muhammed Ahmed

Software engineer · Full-stack developer

## 01 SUMMARY

I'm Muhammed Ahmed, a software engineer and full-stack developer born in 1998, working in Türkiye (Turkey). I cover mobile, web, back end and interface design end to end. I founded Zerova Bilişim, a software company based in Bingöl, and developed Deprem112, RadarX Navigasyon and corporate websites. I graduated in Software Engineering from Gazi University.

## 02 EXPERIENCE

**Zerova Bilişim**

Founder and software developer

Software company based in Bingöl. Mobile apps, web platforms and back-end work; products are Deprem112 and RadarX Navigasyon.

## 03 EDUCATION

**Gazi University — Software Engineering, 2020**

Graduate

## 04 SELECTED WORK

**Deprem112** deprem112app.com

Emergency radio, SOS and messaging without internet.

Not an official early warning system and no replacement for 112; earthquake notifications arrive after an earthquake has happened.

**RadarX Navigasyon** RadarX Navigasyon · Google Play

Voice navigation and radar alerts for roads in Türkiye.

For information only; always follow traffic rules. This is an independent app, not developed or endorsed by any public authority.

**Zerova Bilişim** zerovabilisim.com

A software company based in Bingöl.

### WEB PROJECTS

**Bingöl Üstün Gıda** bingolustungida.com

Corporate website with a wholesale and dealer portal.

**Cihan Patent** cihanpatent.com

Corporate website for a trademark and patent consultancy, with its own admin panel.

**Deprem112** deprem112app.com

Product website for the app, a static site that includes pages for all 81 provinces.

**Zerova Bilişim** zerovabilisim.com

The company's corporate website, in Turkish and English.
